

SAN PITCH RIVER DISTRIBUTION SYSTEM

**** 1967 WATER ASSESSMENT ****

\$ 3,000.00

BASIS OF ASSESSMENT:

Beginning with the 1965 Water Assessment, the annual assessment is based upon the Commissioner's Annual Report of water delivered in the previous year instead of the previous 5-year's average as had been done in the past.

CALCULATION OF THE 1967 WATER ASSESSMENT:

- (1) Total acre-feet of water delivered in 1966 is: 19,119.72
- (2) \$ 3,000.00 divided by 19,119.72 acre-feet of water equals \$ 0.1569060635, which is the cost of one pro-rata acre foot of water used during the year of 1966. This multiplied times the amount reported as used by each individual water user equals his or her 1967 Water Assessment.

PROOF:

\$ 0.1569060635 times 19,119.72 acre-feet equals \$ 3,000.00
